Digital Parenting

June 2016

Social Media Today

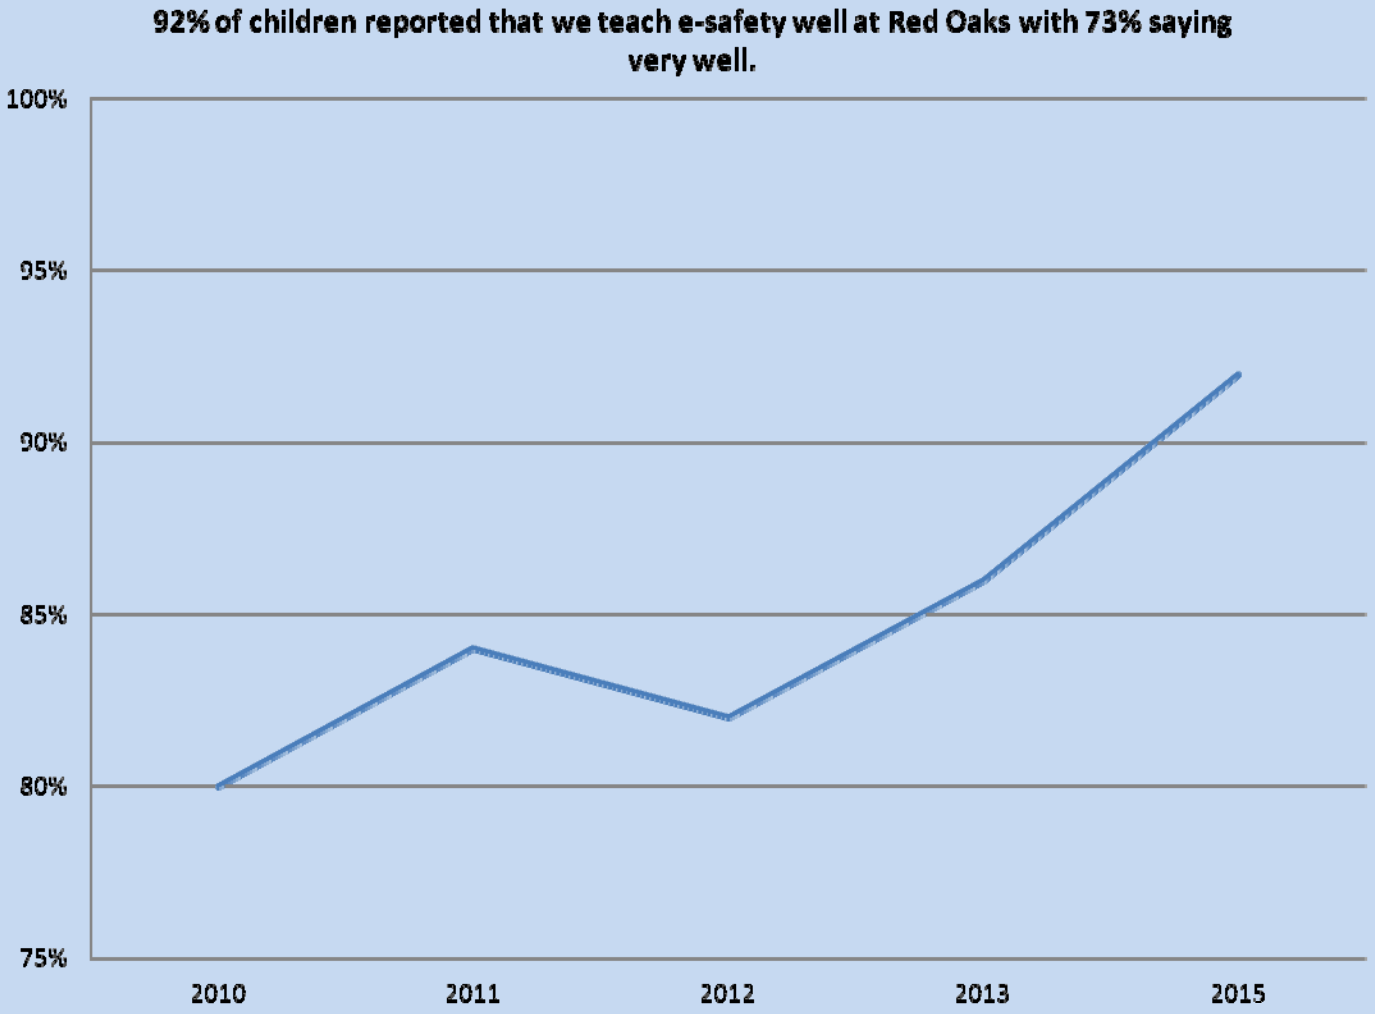
Today's objectives

- To share the picture of online safety at Red Oaks and the profile of our children.
- To celebrate the benefits of technology in our children's lives.
- To share our views on proactive digital parenting and what this looks like.
- To inform parents of key risks at the current time for primary aged children.
- To share resources and signpost where to get further support from.
- To find out how we can help you and your children stay safe in this digital world.

What worries you about your child being online? What do you want from today's session?

New Computing Scheme of Work

- The new national curriculum for computing has been developed to equip young people with the foundational skills, knowledge and understanding of computing they will need for the rest of their lives.
- It focuses on:
  - Learning how computers and computer systems, including the Internet work.
  - The opportunities computing offers for communication and collaboration.
  - Using search technologies effectively and supporting them to become discerning in evaluating digital content and its reliability.
  - Selecting, using and combining a variety of software on a range of digital devices to design and create a range of programs, systems and content to collect, analyse, evaluate and present data and information.
  - Using technology safely, respectfully and responsibly; recognising acceptable/unacceptable behaviour and identifying a range of ways to report concerns about content and contact.



92% of children reported that we teach e-safety well at Red Oaks with 73% saying very well.

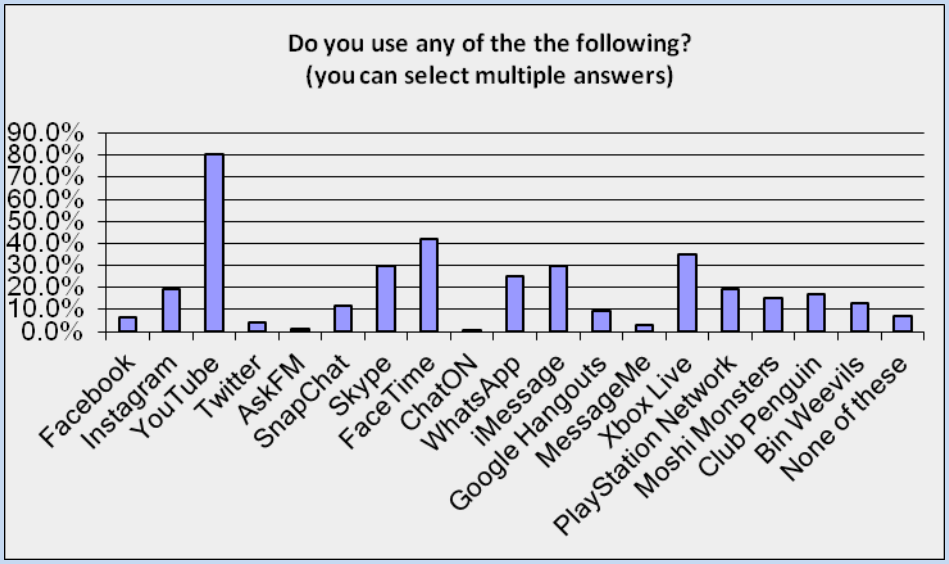
What do you think the majority of Key Stage children at Red Oaks are using technology/the internet for?

Our KS2 children: use of Technology

- Tablets (71%), SMART TV's (70%) , games consoles (68%) and laptops (62%) are the most popular form of internet use outside of school. Almost half use a desktop computer and almost one third an e-book reader. Over half use the internet on a mobile phone.
- 30% of children are spending more than 3 hours on a games console a day, 25% on an ipad and 24% a Smart TV.



- It appears our children are mainly using the internet for watching videos/creating content, gaming, text, photo and video messaging and child-friendly social networking sites. Only 6% are on Facebook and 4% on Twitter.
- 90% do not have an account/friends on social networking sites such as Facebook, Snapchat, Instagram and Twitter.

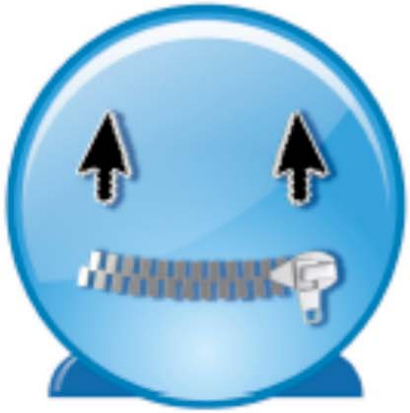
What is online safety about?

- **E**mpowering children to keep themselves safe when online....
- **E**ncouraging them to be responsible users of the technology....
- **E**ngaging children to recognise the risks and benefits of online communication



ZIP IT

Keep your personal stuff private and think about what you say and do online.

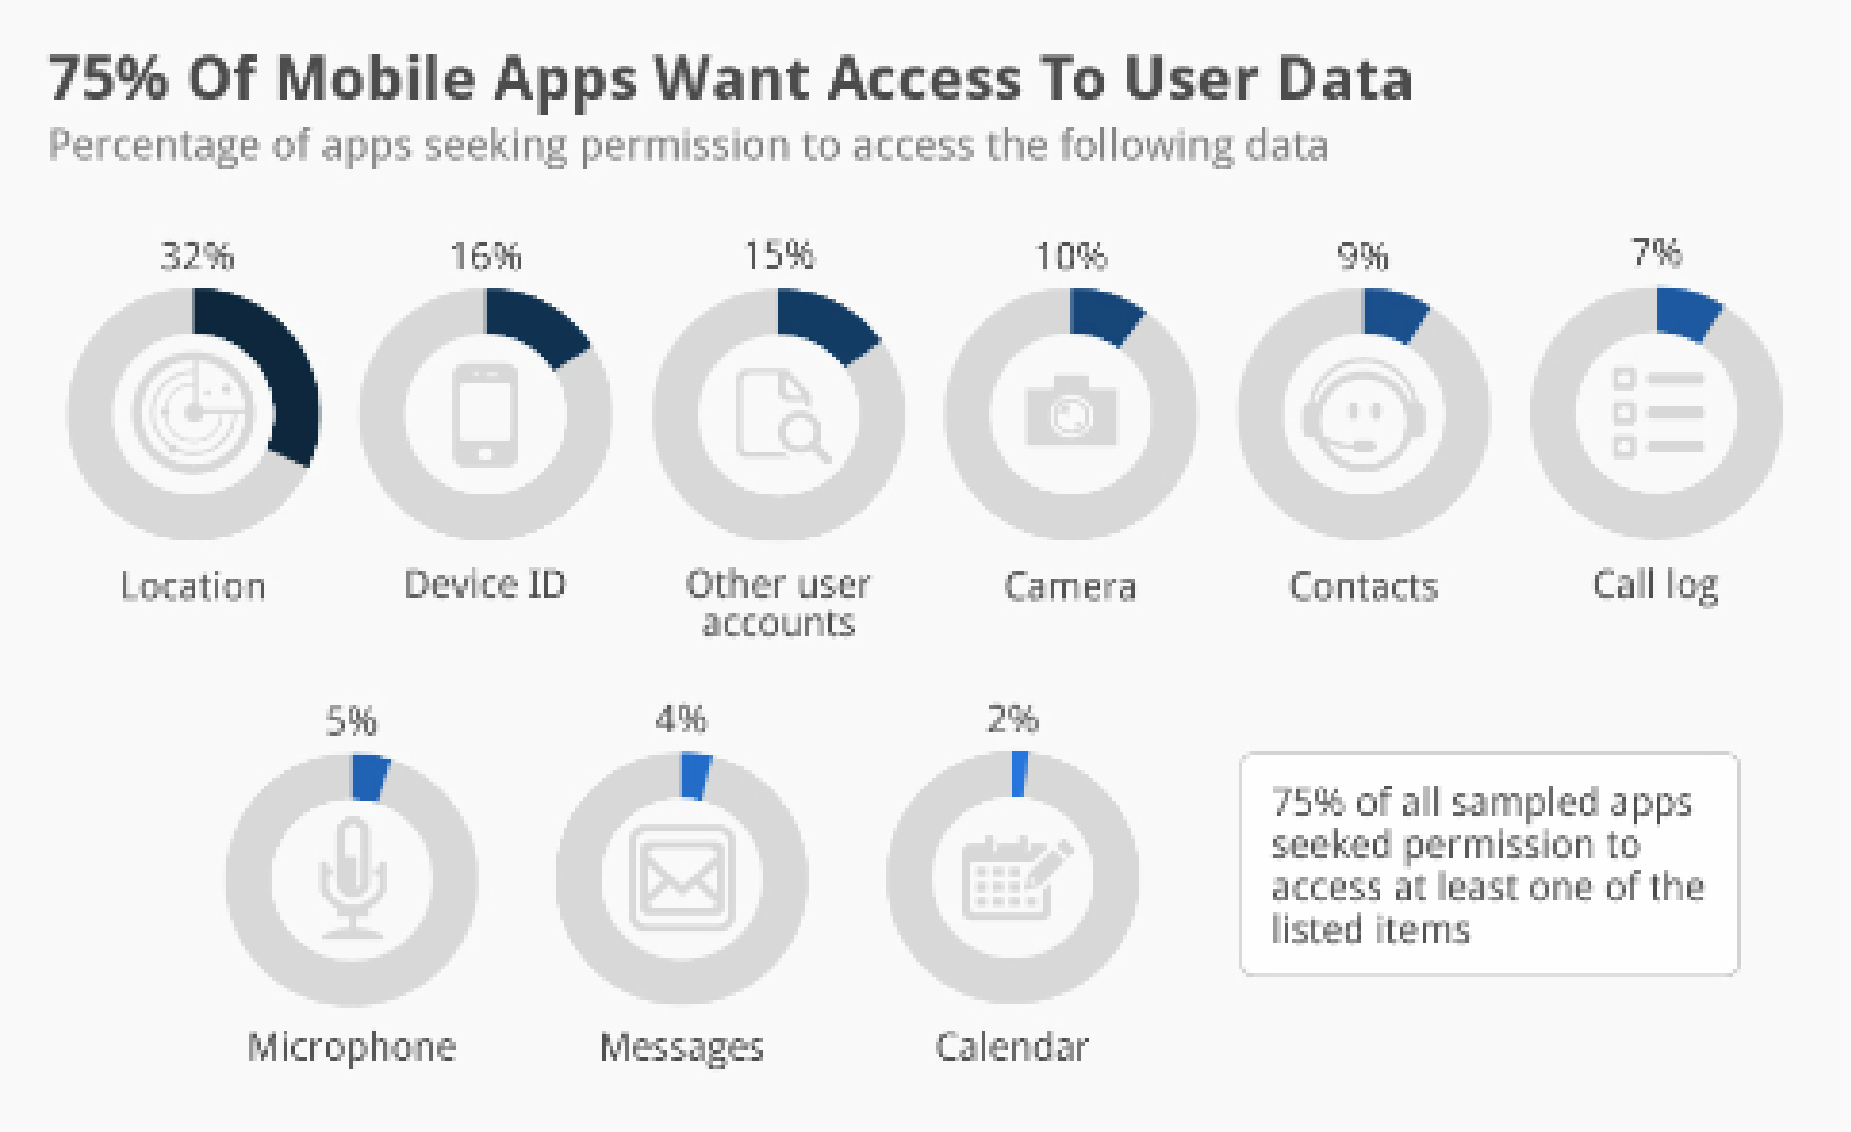
BLOCK IT

Block people who send nasty messages and don't open unknown links and attachments.

FLAG IT

Flag up with someone you trust if anything upsets you or if someone asks to meet you offline.

We also share data without even meaning to…



Check out your apps! Your location 24/7 access can be sold!

The '*Net* effect'

How the Internet *changes the equation...*

- **Disinhibition:** Lack of visual cues reduces empathy
- **Persistence & searchability:** A permanent easily searchable archive
- **Replicability**: ability to copy and paste from anywhere, to anywhere in a split second
- **Scalability:** high potential visibility
- **Invisible audiences:** you never know who's watching
- **Blurring of public and private:** boundaries not clear

Sharing pictures of your children online

Most parents love sharing photos of their children with friends and family. But remember - pictures you share online could be out there for ever. Learn how to protect your child whilst staying social.

Are you a 'sharent'?

For many children online life begins before birth, when their excited parents-to-be post ultrasound images on social media. According to a recent poll, the average parent will share their child's image online nearly 1000 times before their fifth birthday (The Parent Zone, 2015). For parent bloggers the total is likely to be double that, or more.

Concerned?

If you're worried about your child and think something is not quite right, it's best to be on the safe side and find out more.

New site check list

- **What can you do? What's its purpose?** - Functions of the site or technologies – picture sharing? Chat? Webcam? IM?
- Is there a **parent/carer section**?
- How do you **report** a problem?
- Can the account/profile be made **private**?
- Does it have any **parental controls**? E.g. time limitations, how much money is spent, emails sent to your account?

Join yourself & see what all the fuss is about! Always remember that nothing online is 100% safe – there is always the potential for misuse either by adults/children.

O2 and NSPCC Online Safety helpline

Some issues are easier to talk through. So we've set up a free helpline to help you keep children safe online. Call us on 0808 800 5002. You can get advice from our experts on anything you're not sure about, including:

- Setting up parental controls on your computer or other devices
- Help adjusting privacy settings
- Understanding social networks
- Concerns about online gaming

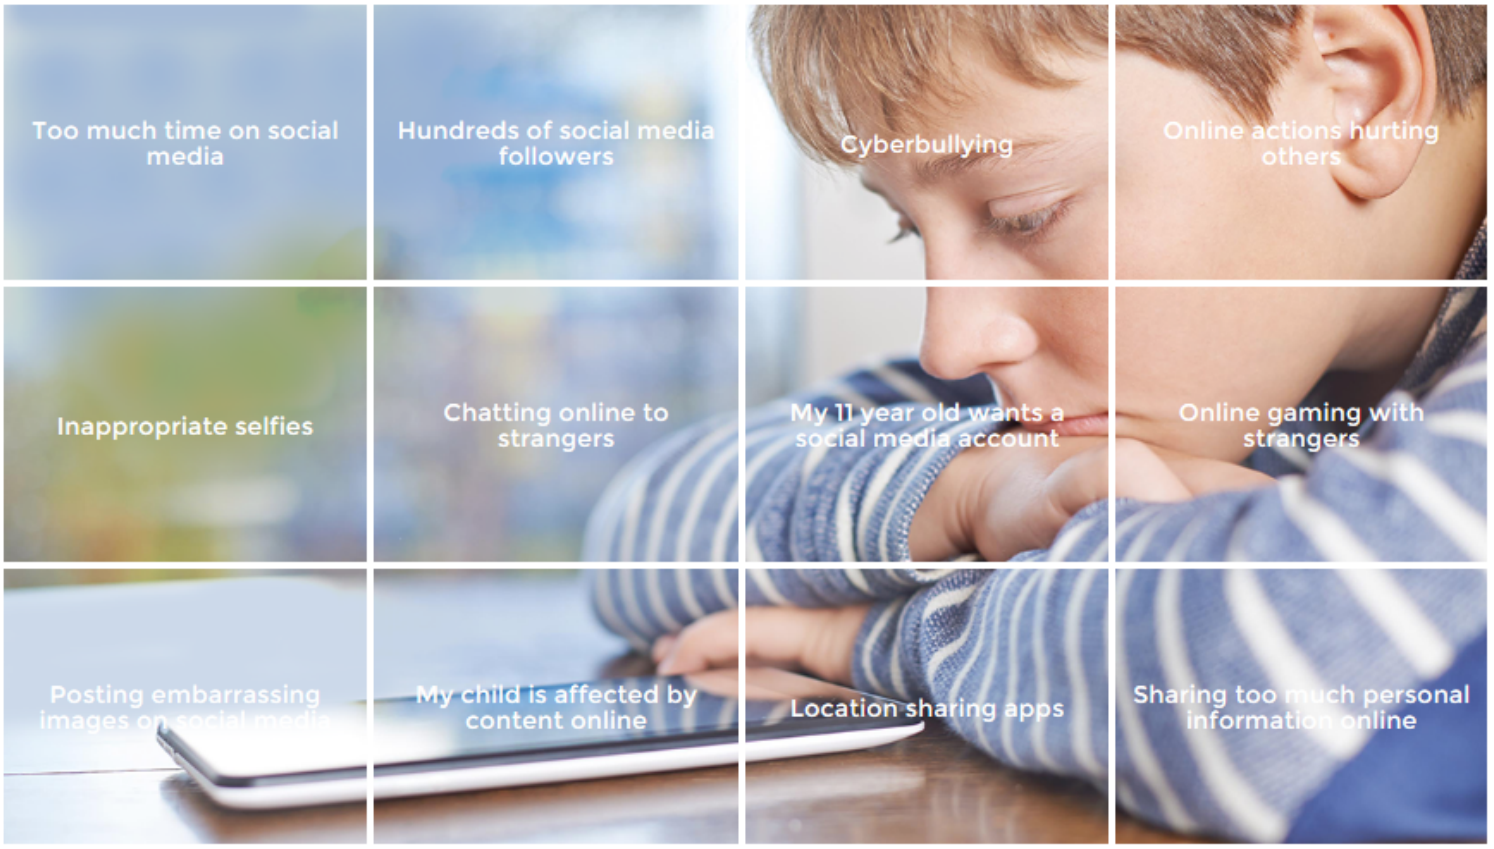
you have open and honest conversations with them about using social media, from posting selfies to chatting and online gaming.

Select the social media concern most relevant to you and reveal the tip



Our KS2 children & cyberbullying

- If they were cyberbullied, it would be a parent that they were most likely to tell (54%).
- When cyberbullied recently, 20% didn't tell anybody, 13% told another adult outside school, 7% a friend, 6% a teacher and 0% another adult in school.
- The number of children being cyberbullied continues to drop – 8% compared to 12% in 2013 and 15% in 2011.
- 58% of these children were bullied on online games, 14% via email, 8% by text, instant messaging or a social networking site.

Our KS2 children: staying safe online

- The number of children who have met someone in real life that they've only met online before – either with a friend, parent or alone has remained static at between 17/18% for the last 4 years. 6% have met a stranger alone that they met online and 7% took a friend. That's 27 children in total this year.

Family Safety Software

Empower and simplify your family's digital life

Sign in to your Microsoft account to set up and manage your family's digital life across Windows PCs, Xbox and mobile devices. Share what's important to you with your family.

Microsoft

Sign in

Create an account

Shopping that stays inside smart limits

Kids can get what they want with the money that you add to their Microsoft accounts. They won't need your credit card, and we won't let them buy stuff that's too old for them.

Find your kids on a map

No more "where are you?" when kids have their Windows phones turned on. Adults in the family can use their phones to make sure that their kids are OK.

A window into their digital life

Activity reports let you check up on your kids' online activity. If you need to, you can block specific apps, games or websites.

Set good screen time habits

Together, you can talk about good habits and set limits on how much time they can spend in front of their screens.

When you sign in, you can:

View all family members

Add a family member

Remove a family member

View your child's activity

Manage your child's online activities and safety

Set your child's permissions for websites, games, apps and films

Set up allowances

Find your child's email address

Choose what info your children can share with people online

Manage your child's allowed screen time

What **do you** want to **protect**?

My Children
from adult content & risky interactions

My Self
from scams or temptations

My Computer
from spyware & malware

My Organization
from adventurous users or threats

Protect Your Children!

An open Internet is unsafe for children and parenting in this digital age is difficult. We provide tools for parents to control unwanted content and provide a safe Internet for your family.

iParenting Media WINNER Award

The National Parenting Center Seal of Approval

Tonight…

- Talk to your child about the sites they use. Ask:
- What are your favourite online sites?
- What do you enjoy most? Why is that a fun site?
- What do you think could go wrong?
- How would you react if things got out of control?
- Let them know that you understand that situations happen online and that seeing ‘adult’ material can make them feel uncomfortable. Make sure they know that you are there to help.
